Akanksha Kumari

|+91 9123421699 | akanksha9123@gmail.com | LinkedIn | GitHub | LeetCode | Portfolio

Education

BTech in Computer Science, *Lakshmi Narain College of Technology Excellence*, 8.72 CGPA 2027
Higher Secondary, *Loyola Convent School*, 90.2 % 2022
Secondary, *St. Anne's Girls' High School,* 95.4% 2020

Projects

StudentConnect: Minor Project [GitHub] *React.js | Node.js | Express.js | MongoDB | JWT Authentication*

- Developed **StudentConnect**, a full-stack campus utility platform using React.js, Node.js, Express, and MongoDB with secure JWT authentication, enabling students to buy/sell items via a marketplace, report and recover lost belongings, and find hackathon teammates through a scalable RESTful web application. 2025

Silent Disease Early Detection: EarlyGuard [Demo] *Python | Scikit-learn | Risk Scoring Models | Node.js | React*

- Built **EarlyGuard**, an ML-driven early disease risk prediction system that models pre-symptomatic health signals from clinical vitals, demographic data, lifestyle features, and optional lab inputs to generate condition-wise risk scores and a unified preventive health assessment. 2025

Behaviour-Based Mobile Authentication: Surakshak [Git] *Python, Behavioral Biometrics, Anomaly Detection, Android (Java)*

- Designed and implemented a continuous authentication system using behavioral biometrics (typing rhythm, touch pressure, swipe dynamics), with real-time risk scoring and anomaly detection to enhance session security and prevent session hijacking and post-login fraud. 2025

Secure Voting Verification Platform: Votify *[Demo] Computer Vision, Face Verification, QR Authentication*

- Built a secure, scalable voting platform with QR-based voter ID and real-time face verification, designing an end-to-end computer-vision authentication flow to optimize accuracy, latency, and fraud prevention. 2024

Research Work

The failure of AI Safety Systems against hallucination generated misinformation 2025

"Proposed a Unified Prevention Framework (UPF) using retrieval grounding, constrained generation, self-verification, and risk scoring to reduce LLM hallucination-driven misinformation."

Technical Skills

Programming	Java, Python
Core CS	Data Structures & Algorithms, OOP, Problem Solving
Backend & Systems	Node.js, Express.js, REST APIs
Web Development	React.js, JavaScript, HTML, CSS
Database	MySQL, MongoDB
Tools & Platforms	Git, GitHub, Android Studio, Postman, Flask, Render, AI Tools, Figma

Achievements

Coding - Solved 400+ problems across LeetCode, GFG, and Codeforces; LeetCode Contest Rating 1646 (Top ~18%).
Selected, PwC Launchpad Program 2026 — Industry-focused engineering upskilling initiative. (Top 50 in 2200)
Winner, Research Conclave 2025 – Winner in Research Paper writing over 50 teams.
Winner, Smart India Internal Hackathon (SIH) 2025 – Won in about 150 teams.
Finalist, Suraksha Cyber Hackathon by Canara Bank, 2025 – Prototype submission Round (Top 100 teams).
Finalist, HackOrbit National Hackathon by MITS Gwalior 2025 – Final Judging Round (Top 25 teams).
GDG Solution Challenge 2025 – Participated as a team of 3, Prototype Development Phase.

Certifications

Welcome to ServiceNow (Zurich) Badge by ServiceNow University.
Oracle Foundation Associate Certification by Oracle.
Associate in IT Foundation Skills *(Java)* by Infosys.
Gen AI Certification by Google Developer Groups.
